

FracNow™ Speedloc™-XT

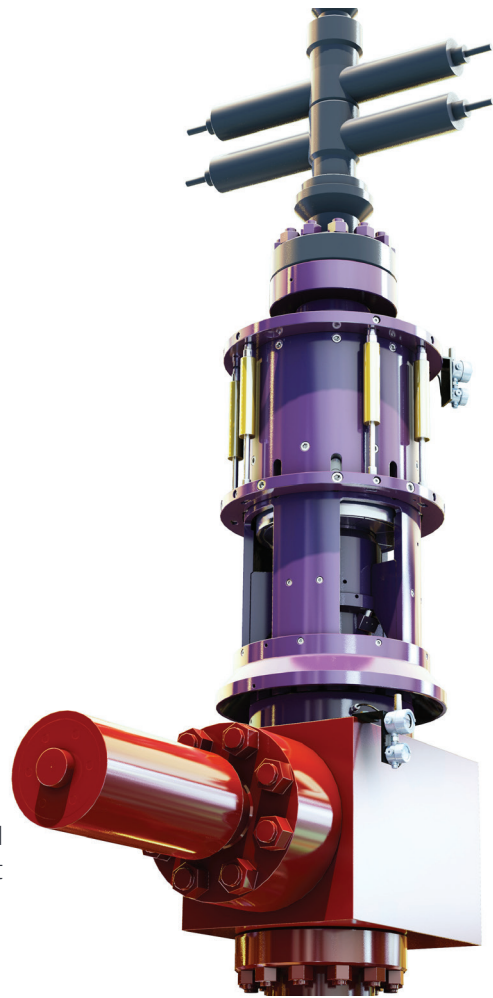

Fast track to first oil or the next pad, and prevent overpressurizing and cutting wireline equipment during completions

TechnipFMC's Speedloc™-XT system is a fully digitized, hydraulic connector to remotely and safely connect and disconnect wireline pressure control equipment from the frac tree during plug and perforation operations.

The Speedloc™-XT system was developed to eliminate manual operations and instead to focus on safety, operational efficiency and predictability. Manual intervention is prone to errors, which can cost you time, money and impact the schedule.

System Specifications:

5"-15,000 psi, integrated SMART system providing controls, lockouts, and system health monitoring, QDCD/valve position verification, system seal verification, wireless and wired option

Why Use the FracNow Speedloc™-XT?

- ▶ Technology safeguards with CyberFrac™ SMART digital system
- ▶ Prevents cutting wireline

- ▶ Follow Process: software reflects SOP and guides operations
- ▶ Creates accountability, predictability, and efficiency

- ▶ Removes personnel from red zone
- ▶ Prevents system overpressurization and inadvertent valve operation

CyberFrac™

- ▶ CyberFrac™ - Integrated SMART connector/frac tree control system
- ▶ Data sensing:
 - Pressure: frac tree, Speedloc™-XT, HPU
 - Position: Speedloc™-XT, frac valves
 - Speedloc™-XT lock/unlock verification
 - Alerts
 - Interlocks
