

## Technip awarded a contract for the K2 field in the Gulf of Mexico

June 2, 2009

Paris, June 2, 2009

Technip has been awarded a contract for the K2 field expansion project, operated by Anadarko Petroleum Corporation in the Gulf of Mexico. Two additional wells will be tied back to the existing subsea equipment and to the Marco Polo platform with production flowlines<sup>(1)</sup>. These wells are located in Green Canyon Blocks 562 and 606, at a water depth of approximately 1,200 meters (4,000 feet).

The contract covers:

- project management and engineering,
- fabrication and installation of two rigid flowlines,
- design, fabrication and installation of four PLETs<sup>(2)</sup>,
- installation of two free issue static umbilicals<sup>(3)</sup>,
- tie-ins, pre-commissioning and survey.

Technip's operating center in Houston, Texas will execute this contract. The flowlines will be welded at the Group's spoolbase located in Mobile, Alabama. Offshore installation is scheduled for the third quarter of 2009, using the Deep Blue, Technip's deepwater pipelay vessel.

---

(1) Flowline: flexible or rigid pipe laid on the seabed for the transport of production or injection fluids.

(2) PLET: Pipeline End Termination.

(3) Umbilical: an assembly of steel tubes and/or thermoplastic hoses. Umbilicals can include electrical cables or optic fibers to support communications, power supply and telemetry functions.
