

Technip and DSME awarded contract for the HEJRE project in Denmark

February 28, 2012

Technip, in partnership with DSME, was awarded by DONG E&P and BAYERNGAS, a contract for the HEJRE project development, offshore Denmark, at a water depth of 70 meters. This contract covers engineering, procurement, fabrication, hook-up, and commissioning assistance for a fixed wellhead and process platform and associated facilities.

The platform includes 11,500-ton topsides supported by a 6,500-ton jacket, and is designed to process high pressure and high temperature hydrocarbons fluids. The platform, which also comprises a living quarter to accommodate 70 people and a flare, will be capable of producing up to 76 million standard cubic feet of gas per day and 35,000 barrels of oil per day.

Technip's operating center in Paris, France, will execute the contract, with the support of the Chennai and Mumbai offices, India. The jacket and wellhead unit will be delivered in 2014, the topsides and living quarter in 2015.

This strategic contract symbolizes the return of Technip on the North Sea Offshore market, as an engineering, procurement and construction (EPC) leader on technically complex projects very demanding in terms of health, safety and environment.
