Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2021

---

---

## Section 1 – Conflict Minerals Disclosure

### Item 1.01 Conflict Minerals Disclosure and Report

In accordance with the requirements of Rule 13p-1 of the Securities Exchange Act of 1934, as amended, TechnipFMC plc (the “Company” and “TechnipFMC”), through a good faith, reasonable country of origin inquiry and subsequent due diligence, as further outlined in the Conflict Minerals Report attached hereto as Exhibit 1.01 for the year ended December 31, 2023 (the “CMR”), evaluated its product lines and determined that certain products that it manufactures or contracts to manufacture may contain tin, tungsten, tantalum, and/or gold originating in the Democratic Republic of the Congo or an adjoining country and are necessary to the functionality or production of such product(s). TechnipFMC determined that these minerals may not have come from recycled or scrap sources.

A copy of this Form SD and CMR are publicly available on the Company's website at [www.technipfmc.com](http://www.technipfmc.com).

### Item 1.02 Exhibit

TechnipFMC's CMR is filed as Exhibit 1.01 hereto.

## Section 2 – Exhibits

### Item 2.01 Exhibits

## SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

### **TechnipFMC plc**

By: /s/ Cristina Aalders

Name: Cristina Aalders

Title: Executive Vice President, Chief Legal Officer  
and Secretary

Date: May 30, 2024

**TechnipFMC plc**  
**Conflict Minerals Report**  
**for the Year Ended December 31, 2023**

## **1. Company Overview and Applicability of Rule 13p-1**

TechnipFMC plc (the “Company,” “TechnipFMC,” “we,” and “our”) is a public limited company incorporated and organized under the laws of England and Wales, with registered number 09909709, and with registered office at Hadrian House, Wincomblee Road, Newcastle Upon Tyne, NE6 3PL, United Kingdom. The Company has operational headquarters in Houston, Texas, United States.

TechnipFMC is a leading technology provider to the traditional and new energy industries, delivering fully integrated projects, products, and services. With our proprietary technologies and comprehensive solutions, we are transforming our clients’ project economics, helping them unlock new possibilities to develop energy resources while reducing carbon intensity, and supporting their energy transition ambitions.

Organized in two business segments — Subsea and Surface Technologies — we continue to advance the industry with our pioneering integrated ecosystems (such as iEPCI™, iFEED™, and iComplete™), technology leadership, and digital innovation.

After evaluating our product lines, we have determined that certain products that we manufacture or contract to manufacture contain tin, tungsten, tantalum, and/or gold (collectively, “3TG”) and that such 3TG are necessary to the functionality or production of such product(s). These products include, but are not limited to, subsea production and processing systems, surface wellhead production systems, high pressure fluid control equipment, measurement solutions, remotely operating vehicle systems, manipulator systems, subsea control systems, fracturing flowback services, and umbilical systems.

## **2. Reasonable Country of Origin Inquiry**

TechnipFMC is a global company with a complex and multi-tiered supply chain. Because of this complexity, we rely on those suppliers that deliver directly to TechnipFMC (the “Tier 1 Suppliers”) to provide input regarding the source of conflict minerals in both the raw materials and parts that we purchase to use in the manufacture of our products. We expect those Tier 1 Suppliers to implement policies and procedures comparable to ours in order to obtain thorough and accurate chain of custody information to inform this reporting.

With the assistance of the third-party vendor Source Intelligence (“SI”), TechnipFMC filters its product offerings to identify those offerings that are in-scope for the purposes of regulatory reporting, and then conducts a good faith, reasonable country of origin inquiry (“RCOI”) to establish a list of Tier 1 Suppliers that are in-scope for regulatory reporting purposes based on TechnipFMC’s influence over the manufacturing process and potential use of 3TG.

---

We then collect information from those suppliers regarding the presence and sourcing of 3TG used in the products and components they supplied to TechnipFMC.

The RCOI process is further detailed in Appendix “I” to this CMR.

Based on our RCOI inquiry, we believe that certain of our products may contain 3TG that originated in the Democratic Republic of the Congo or its adjoining countries (the “Covered Countries”) and were not from recycled or scrap sources. As such, we then proceeded to exercise due diligence on the source and chain of custody of such 3TG.

### 3. Due Diligence

For those supply chains with 3TG smelters or refiners (the “SOR”) that are known, or thought to be sourced from Covered Countries, additional investigation is needed to determine the source and chain-of-custody of the regulated metals.<sup>1</sup>

SI has become an official vendor member of the Responsible Minerals Initiative (“RMI”) to further facilitate the exchange of supply chain data and technical information in the quest for global ethical sourcing of materials. This membership provides SI access to the following working groups: Engage with the CMRT Development Team, Smelter Engagement Team, Smelter Data Management Team, RMI Stakeholders Call, and RMI Plenary.

If the SOR is not certified by these internationally-recognized schemes, SI attempts to contact the SOR to gain more information about their sourcing practices, including countries of origin and transfer, and whether there are any internal due diligence procedures in place or other processes the SOR takes to track the chain-of-custody on the source of its mineral ores. Relevant information to review includes whether the SOR has any of the following: a documented, effective, and communicated conflict-free policy, an accounting system to support a mass balance of materials processed, and traceability documentation. Internet research is also performed to determine whether there are any outside sources of information regarding the SOR’s sourcing practices. Up to three contact attempts are made by SI to the SOR to gather information on mine country of origin and sourcing practices.

In our review of supplier responses and due diligence results, following OECD guidance and TechnipFMC policies and procedures, the facility CID003185 – African Gold Refinery – Uganda was identified as a potential SOR and as an entity sanctioned by the United States Department of Treasury, Office of Foreign Assets Control on March 17, 2022. Consequently, we have initiated risk mitigation activities as part of our risk management plan, which will include notifying Tier 1 Suppliers and requesting their proactive risk management steps to cascade this directive through their supply chains to address and remove the presence of this SOR from their supply chain.

TechnipFMC’s due diligence measures can only provide a reasonable, and not absolute, assurance regarding the source and custody of conflict minerals. As such, we cannot definitively confirm that the identified SORs on the CMRTs processed the 3TG present in TechnipFMC’s finished products. Our due diligence process is based on the necessity to obtain information from our Tier 1 Suppliers and those suppliers seeking similar information within

---

their supply chains to identify the original sources of the necessary conflict minerals. Such sources of information may yield inaccurate or incomplete information, may not respond, and some may be subject to fraud. However, we have taken measures to verify responses and minimize these limitations but cannot guarantee the accuracy of the responses provided.

Appendix "II" to this CMR lists, as of March 31, 2024, the Company's SORs with indications of certification status.

---

## APPENDIX "I"

TechnipFMC provided SI with at least one method of contact for each Tier 1 Supplier designated as in-scope (e.g., email address or telephone number). Email was the preferred method of communication.

The RCOI began with an introductory email from SI to the in-scope suppliers containing a registration and survey request link for the on-line data collection platform. In an effort to increase awareness of the Conflict Minerals Compliance Program (the "CMCP"), supporting regulation, and frequently asked questions (FAQs) concerning 3TG mineral tracing, our suppliers were introduced to the SI Conflict Minerals Learning Center (<https://www.sourceintelligence.com/what-are-conflict-minerals>) in the initial registration step. The Conflict Minerals Learning Center was provided as an educational tool to facilitate a deeper understanding of the program and context as to why information is being requested. There were also opportunities to participate in webinars providing information on the Conflict Minerals Rule.

Subsequent engagement followed these steps:

- Following the initial introduction and information request, up to five reminder emails were sent to each non-responsive supplier requesting completion of the survey.
- Suppliers who remained non-responsive were contacted by telephone and offered assistance. This assistance included, but was not limited to, further information about the CMCP, an explanation of why the information was being collected, a review of how the information would be used, and clarification regarding how the information needed could be provided.

### Deadline for Responses

In recognition that the information requested is time consuming to collect and aggregate, suppliers were given a firm deadline of March 31, 2024 to provide information about the metal processors present in their supply chains for the 2023 reporting year.

### Information Requested

Suppliers were asked to provide information regarding the sourcing of their materials with the ultimate goal of identifying SORs and associated mine countries of origin. Suppliers who had already performed an RCOI through the use of the Conflict-Free Sourcing Initiative's Conflict Minerals Reporting Template (the "CMRT") were asked to upload this document into the Source Intelligence system or to provide this information in the online survey version.

Where a supplier was unable to provide a CMRT, SI requested information on its suppliers of products or components that may require 3TG for their production or functionality. These Tier 2 suppliers, and subsequent tiers of suppliers, as needed, were then engaged following the contact procedures explained above. When contact information was provided, Tier 2 and beyond suppliers were contacted via email or phone in order to build a chain-of-custody back to the 3TG SOR. Every effort was made to address and meet the concerns of suppliers

---

regarding their need to maintain the confidentiality of their data. In order to address this concern, SI executed non-disclosure agreements with TechnipFMC suppliers when requested.

We chose to give our suppliers the ability to share information at a level with which they were most comfortable, (*i.e.*, company, product, or user-defined, but the declaration scope had to be specified). Suppliers were asked to provide an electronic signature before submitting their data to verify that all responses submitted were accurate to the best of the supplier's knowledge.

### Quality Assurance

Supplier responses were evaluated for plausibility, consistency, and gaps. If any of the following quality control flags were raised, suppliers were automatically contacted by SI on a bi-weekly basis, up to three times:

- One or more SORs were listed for an unused metal;
  - SOR information was not provided for a used metal, or SOR information provided was not a verified metal processor;
  - Supplier answered "yes" to sourcing from the Covered Countries, but none of the SORs listed were known to source from the region;
  - Supplier indicated that they have not received conflict minerals data for each metal from all relevant suppliers;
  - Supplier indicated they have not identified all of the SORs used for the products included in the declaration scope;
  - Supplier indicated they have not provided all applicable SOR information received; and/or
  - Supplier indicated 100% of the 3TG for products covered by the declaration originates from scrap/recycled sources, but one or more SORs listed are not known to be exclusive recyclers.
-
